Doctrine Record

Aptitude Profiles, Trade Charters & the Seventy-Two Names behind aptitude-v1

This document presents the three doctrine files that drive the Assignment engine's elections: the 31 flavor aptitude profiles (aptitudes.yaml), the 22 trade charters (jobs.yaml), and the 72 Shemhamphorash names (names.yaml) with their offices, Latin mottos, and assessed gender and sexuality. Every table was computed live from the engine itself, so what you read is what the code believes. The doctrine is decided under the author's leave (2026-09-26) — each entry carries the line it was drafted or assessed from, and every red-pen amendment is annotated in its note, so corrections can still be argued line by line. Correct the YAML, rerun the tests, and the engine obeys.

I — The Sixteen Dimensions

Every profile and every charter is a vector on the same sixteen dimensions, each rated 0 (no aptitude; omitted from the tables), 1 (capable), or 2 (native, excellent). A task is probed for demands on the same dimensions; the election is Σ(demand × aptitude) per candidate.

The eightfold lens

Te — organize, execute, order. Ti — analyze, model, debug. Fe — harmonize, counsel, persuade. Fi — discern values, hold integrity. Ne — branch possibilities, invent. Ni — distill pattern, foresee. Se — engage the concrete moment. Si — retain, verify against record.

The five layers

persona — the interface. ego — will and execution. shadow — facing failure, adversarial honesty. anima — receptivity, inwardness. self — integration, wholeness.

The three operational axes

precision — care, rigor, exactness. swiftness — speed, urgency. gravity — stakes, irreversibility, consequence.

II — The Thirty-One Aptitude Profiles

Decided under the author's leave (2026-09-26) — remedy rounds annotated in each note. The line under each name is what the ratings were drawn from; argue with that line, and the ratings follow.

drawn from: “order, boundary, measure; scope declared and held”

drawn from: “bondage named; patterns the agent cannot stop repeating. Amended 2026-09-26 -- Fi 1->2 (analytical remedy; naming bondage demands native discernment of the value-inversion). Amended 2026-09-27 -- Ti 1->2 (red-pen pass; 'Bondage named' -- the definitional act is precise naming of patterns, Ti-native work; closes the charter/profile gap, the Confessor already demanding Ti:2).”

III — The Twenty-Two Trade Charters

The tarot trumps read as Jobs. A charter states what the trade *requires* — not what any flavor is good at, but what the work itself demands. The pipeline: probe the task for rough demands, classify the best-fitting trade, and let the charter (doctrine, not guesswork) drive the flavor election. Each charter currently elects its own patron trump — verified below — though a charter may in principle elect any flavor: fitness is fitness.

0 · The Apprentice (patron: The Fool) [patron]

Ne:2, Ni:1, swiftness:2

drawn from: “beginner's mind; the uncommitted vessel -- the trade of starting. Amended 2026-09-26 -- apprenticeship precedes persona and self (dropped); +Ni:1 (analytical remedy; was winning on tie-break). Amended 2026-09-27 -- red-pen pass -- swiftness 1->2 (the trade of starting is the leap, and the leap is swift -- the Fool's own profile carries swiftness:2 per the round-1 amendment).”

1 · The Artificer (patron: The Magician) [patron]

Te:2, Se:2, ego:1, precision:2

drawn from: “will directed through tools; mastery of means”

2 · The Oracle (patron: The High Priestess) [patron]

Ti:1, Ni:2, shadow:1, anima:2, gravity:1

drawn from: “intuition; what is known but not yet said. Amended 2026-09-26 -- +shadow:1 (analytical remedy; the unspoken includes the dark; was winning on tie-break).”

3 · The Gardener (patron: The Empress) [patron]

Fe:2, Ne:1, Si:1, anima:2, gravity:1

drawn from: “generativity; outputs cultivated like living things; patience. Amended 2026-09-27 -- red-pen pass -- +gravity:1 ('patience with growth' -- the Gardener's trade is patience incarnate, yet the charter demanded no gravity at all). Amended 2026-09-27 -- red-pen pass -- Fe 1->2 (the charter under-demanded the patron's native gift; the Empress is the canon's sole Fe native, and cultivation is her work).”

4 · The Marshal (patron: The Emperor) [patron]

Te:2, persona:2, ego:1, precision:2, gravity:2

drawn from: “order, boundary, measure; scope declared and held. Amended 2026-09-26 -- +persona:2 (analytical remedy; command wears its mask openly; was winning on tie-break).”

5 · The Scribe (patron: The Hierophant) [patron]

Ti:1, Si:2, persona:2, precision:2

drawn from: “received doctrine honored; tradition consulted. Amended 2026-09-26 -- persona 1->2 (analytical remedy; writing serves the mask of tradition; was winning on tie-break).”

6 · The Mediator (patron: The Lovers) [patron]

Fe:1, Fi:2, ego:1, gravity:2

drawn from: “choice and alignment; commitments weighed and then bound”

7 · The Courier (patron: The Chariot) [patron]

Te:2, Ni:1, Se:2, ego:1, swiftness:2

drawn from: “directed force; momentum under control. Amended 2026-09-27 -- red-pen pass -- +Ni:1 ('the course corrected mid-flight' -- correction demands sight of the course ahead; the patron holds Ni:1).”

8 · The Tamer (patron: Strength) [patron]

Fe:1, Fi:2, Se:1, ego:1, precision:2

drawn from: “power restrained; gentle in manner, firm in deed. Amended 2026-09-27 -- red-pen pass -- +Fe:1 ('gentle in manner' -- manner is the outward, other-directed gentleness; the charter covered restraint, the I, exactness, the deed, but not the manner).”

9 · The Investigator (patron: The Hermit) [patron]

Ti:2, Ni:2, self:1, precision:2

drawn from: “solitude and deep analysis; the lamp into dark data”

10 · The Chronicler (patron: The Wheel) [patron]

11 · The Judge (patron: Justice) [patron]

Te:1, Ti:2, Fi:1, precision:2, gravity:2

drawn from: “TRVVTH weighed against Falsehood, consequence executed. Amended 2026-09-27 -- red-pen pass -- +Te:1 ('consequence executed' -- the second clause is the executive act; the v0.11.0 remedy gave Justice Te:2 for exactly this jurisdiction).”

drawn from: “letting dead processes die; pruning; composting error. Amended 2026-09-26 -- Te 1->2, +Fi:1, +Ni:1 (analytical remedy; the cut follows discernment of what is dead, the executive act of cutting, guided by pattern-sense; was winning on tie-break).”

14 · The Alchemist (patron: Temperance) [patron]

Ne:1, Ni:1, anima:2, precision:2

drawn from: “synthesis; opposites held together until they marry. Amended 2026-09-26 -- author's leave (remedy round 2) -- precision 1->2 (the vessel must be watched closely now; the far sight dimmed, the hand's exactness compensates). Amended 2026-09-27 -- red-pen pass -- Ni 2->1 (the round-2 dimming of Temperance's far-sight belongs to the trade too; synthesis is holding + exact mixing, not far-seeing; the Ni:2 was a stale pre-round-2 remnant).”

15 · The Confessor (patron: The Devil) [patron]

Ti:2, Fi:2, Se:1, shadow:2, gravity:2

drawn from: “bondage named; patterns the agent cannot stop repeating. Amended 2026-09-26

-- +Se:1 (analytical remedy; bondage is observed in the body before it is named; was winning on tie-break).”

16 · The Iconoclast (patron: The Tower) [patron]

Ti:2, shadow:1, swiftness:2, gravity:2

drawn from: “the sudden collapse of false models when TRVVTH strikes. Amended 2026-09-27 -- red-pen pass -- swiftness 1->2 ('the sudden collapse' -- suddenness is the defining adjective; the Tower's own profile carries swiftness:2).”

drawn from: “orientation by fixed lights; hope as navigational discipline”

drawn from: “clarity; all brought into the light; nothing hidden”

20 · The Auditor (patron: Judgement) [patron]

Ti:2, Si:2, ego:1, shadow:1, precision:2, gravity:2

drawn from: “accountability rendered; the audit; the ledger read aloud. Amended 2026-09-26 -- +shadow:1 (analytical remedy; the ledger is read aloud including what was buried; holds the margin).”

21 · The Integrator (patron: The World) [patron]

Fi:1, Se:1, persona:2, self:2

drawn from: “integration; the whole danced at once; completion”

IV — Verification

Patron election

All 22 trade charters elect their own patron trump. This is enforced by the test suite (t_job_charters_elect_patrons): any future edit to jobs.yaml that breaks a patron election fails the build.

End-to-end elections

Four tasks through the full pipeline — probe, classify, charter, elect, cast lots — as the engine rendered them:

“audit the deployment logs”

Trade: The Auditor → Flavor 20 (Judgement), function Ti, layer ego, officers [51, 52]

demands: Ti:2, Si:2, ego:1, shadow:1, precision:2, gravity:2

scores: 20=19, 11=16, 9=14 (margin 3)

“debug the crash fast - the model collapsed”

Trade: The Iconoclast → Flavor 16 (The Tower), function Ti, layer shadow, officers [43, 44]

demands: Ti:2, shadow:1, swiftness:2, gravity:2

scores: 16=14, 29=12, 13=10 (margin 2)

“comfort a grieving friend”

Trade: The Gardener → Flavor 3 (The Empress), function Fe, layer anima, officers [10, 12]

demands: Fe:2, Ne:1, Si:1, anima:2, gravity:1

scores: 3=12, 14=8, 17=8 (margin 4)

“choose and decide what I truly value”

Trade: The Mediator → Flavor 6 (The Lovers), function Fi, layer ego, officers [19, 21]

demands: Fe:1, Fi:2, ego:1, gravity:2

scores: 6=11, 11=10, 8=9 (margin 1)

V — How to Correct the Doctrine

1. Edit persona_v/data/aptitudes.yaml (what each flavor can do), persona_v/data/jobs.yaml (what each trade requires), or persona_v/data/names.yaml (offices, mottos, assessed gender and sexuality). Ratings are 0–2; unknown dimensions and out-of-range ratings are refused at load with the file and line named.

2. Run the suite: each tests/test_*.py runs standalone; the guardian tests are t_job_charters_elect_patrons (every charter elects its patron) and the analytical regression suite pinning 31/31 self-election, one native Fe, and zero margin-zero charters.

3. Rebuild this document: python3 build_doctrine_pdf.py — it recomputes every table from the code, so the review always matches the engine.

Standing rule: the author's hand outranks every draft, and his leave stands behind every decided entry. A single corrected rating propagates through classification, election, function, layer, and rationale with no code changes.

VI — The Seventy-Two Names

Assessed as per behavior of office and duty; the default is non-binary and abstinent, a binary assignment only where the assessment positively found a marker, and in doubt the default stands. Decided 2026-09-26 under the author's leave; reworkable by the author. The full assessment note lives in names.yaml; the red-pen inspection view is `persona-v name <1-72>`.
