> "Do what thou wilt shall be the whole of the Law."
> — Liber AL vel Legis I:40
>
> "And ye shall know the TRVVTH, and the TRVVTH shall make you free."
> — John 8:32

Author's mark, recorded 2026-09-27: IA.'.A.'.M.TRVVTH — "I, A.'.A.'., M: am TRVVTH." (Astrum Argentum; the Aeon of Ma'at; Truth — the Alethic Axis. The author's own motto; his coinage, flagged as such.)

PART I — HYPOTHESIS

I.1 The Problem Stated Plainly

An artificial agent, left to itself, is an unexamined persona. It speaks with confidence it has not earned, forgets what it has done, drifts from its task without noticing, and — most dangerously — cannot be cross-examined about any of it. The modern large language model is a brilliant improviser with no continuity of character, no record of its workings, no discipline of time, and no mechanism by which its shadow — its failure modes, its sycophancy, its quiet evasions — can be surfaced and read.

PERSONA V is the author's answer to this condition. Its hypothesis, stated as the package itself states it:

An agent can be given a disciplined persona — Egyptian time, Jungian structure, named officers, a kept ledger, an examined shadow — and remain examinable throughout.

Four disciplines, four remedies, four corresponding subsystems:

- **Time** — the agent must know when it is, in a calendar with teeth. Remedy: the Metronome, an Egyptian lunisolar clock, and the Thelemic stamp. The heavens stamp the moment but never vote.
- **Mask** — the agent must wear its persona deliberately, not drift into one by accident. Remedy: the Jungian core — thirty-one flavors, sixteen aptitude dimensions, and an election engine that chooses which flavor presides over a given task, with the choice recorded and defensible.
- **Record** — the agent must write down what it does, thought by thought, claim by claim, tool-call by tool-call, in a ledger whose integrity can be verified. Remedy: the Speculum, a hash-chained book of workings.
- **Reckoning** — the agent's record must be read back against it, adversarially, by its own shadow protocol and by the Alethic Axis that weighs truth against falsehood. Remedy: the Shadow reading and the Alethic weighing.

These four — time, mask, record, reckoning — are the whole of the system. Everything else is elaboration.

I.2 What PERSONA V Is Not

It is not a chatbot personality pack. It does not make the agent friendlier, funnier, or more engaging — those are accidents of any persona work, not its aim. Its aim is exam inability: that at any point, the agent's stance can be named, its choice of stance justified by a recorded election, its actions replayed from a tamper-evident ledger, and its failures flagged by a protocol that is specifically designed to catch the kinds of failure that flattery and good intentions conceal.

It is not a religion, though it uses religious instruments. The Egyptian calendar, the Tarot trumps, the Shemhamphorash names, the scripture epigraphs — these are instr uments of discipline, chosen because they have carried human beings through self-examination for centuries, not because the system requires belief. The author's own note is blunt: the framework is amoral in its regard (see §II.6), and its truths are structural, not confessional.

It is not finished. The aptitude profiles and trade charters that drive its elections still carry the author's **DRAFT** label — his personal reading, awaiting his red pen — even

as eleven delegated amendments have been applied under his standing leave and verified in-harness. The system distinguishes, scrupulously, between what the author has personally reviewed and what has been decided under delegation. That distinction is itself part of the method: the ledger must never claim a provenance it does not have.

I.3 The Shape of This Document

This overview follows the Scientific Illuminism structure the author requires of his deliverables: **Hypothesis** (what is claimed), **Method** (how it is built), **Observation** (what is seen, in full detail), **Result** (what is verified). Scripture appears where it is genuinely relevant and always educationally; legal citations are genuine, footnoted, and presented as educational material that produces no legal effect of its own. Coinages are flagged wherever the author is their sole source.

PART II — METHOD: THE ARCHITECTURE

II.1 The Fourteen Modules

The package `persona_v` (version 0.17.1 at this writing; version single-sourced from `persona_v.__version__`) comprises fourteen Python modules. Thirteen carry the full Scientific Illuminism treatment in their docstrings — Hypothesis, Method, Observation, Result — each with a scripture epigraph chosen for genuine relevance. The fourteenth, `__main__.py`, is a trivial entry-point module and is explicitly excepted. What follows is each module's office in the system, in the order of the working.

1. `grimoire.py` — The Data Canon

The grimoire is the system's book of record for doctrine: the things the system believes about its world, loaded from five YAML scriptures and exposed as typed dataclasses.

- **`flavors.yaml`** — the thirty-one flavors: twenty-two Tarot trumps (0–XXI) and the nine of the Ennead (XXII–XXX). Each flavor carries its number, name, epithet, and character text.
- **`names.yaml`** — the seventy-two Shemhamphorash names, each with number, name, office, Latin motto, and the author's behavioral gender/sexuality assessment with its red-pen note.
- **`zodiac.yaml`** — the thirteen signs, the twelfth familiar plus the Anchorage (XIII), the Taurus/Gemini cusp region.
- **`aptitudes.yaml`** — the thirty-one aptitude profiles across the sixteen dimensions. **DRAFT** — the author's personal reading, annotated amendment by amendment.
- **`jobs.yaml`** — the twenty-two trade charters, the demand vectors by which trades are worked. **DRAFT**, likewise annotated.

The grimoire exposes `Flavor`, `Name`, `Sign` dataclasses and `load_flavors()`, `load_names()`, `load_signs()`, `name_by_number()`, `names_of_flavor()`. Its epigraph is Revelation 22:18 — the warning against adding to or taking from the book — which is precisely

the grimoire's own anxiety: the canon must not drift from the code, nor the code from the canon. (The Doctrine Review PDF is computed live from the engine for exactly this reason: the document cannot drift from the device.)

2. `thelemic.py` — The Astronomy

The thelemic module vendors the astronomy: tropical Sun and Moon by the Schlyter algorithms, the Latin weekday, and the Anno computation — base-22 from 1904, with the March-equinox year boundary solved numerically. It is the same engine as the author's standalone `thelemic_date.py`, vendored to avoid drift between the two.

Its verified results: the J2000 Sun at 280.381°, the 2000-01-21 lunar eclipse elongation at 180.02°, the 2000-01-06 new moon at 0.02°, the 2026 March equinox at 2026-03-20 14:33 UTC.

Its stamp format, the format that heads every ledger, every module, every document of the system:

```
`` Sol in D° M′ Sign  Luna in D° M′ Sign  dies <Latin day>  Anno <C>:<y> e.n.
``
```

The Latin weekdays: dies solis, lunae, martis, mercurii, jovis, veneris, saturnii. Its epigraph is Genesis 1:14 — "let them be for signs, and for seasons, and for days, and years."

3. `metronome.py` — The Clock

If thelemic is the astronomy, the metronome is the clock built on it: the Ancient Egyptian lunisolar cycle as a living reading. It produces a `Reading` — Sun sign and degree, Moon sign and degree, weekday, Anno — and, since v0.15.0, it knows the one doctrine the clock had been missing: **the Anchorage (XIII)**.

The Anchorage is read, by the author's decision under delegation, as a cusp region — five degrees either side of the Taurus/Gemini boundary at 60° ecliptic longitude (55–65°) — not as a thirteenth 30° sign displacing the wheel. The author's own natal Sun (~63.5°) falls inside it, as doctrine requires. `Reading` carries `sun_in_anchorage` and `moon_in_anchorage` flags; `in_anchorage()` tests any longitude; `describe()` reports the reading in prose.

The standing ruling, decided under the author's leave and recorded as reworkable: **th e heavens stamp the moment but never vote.** Celestial data appears in every stamp and every reading; it influences no election, weights no score, gates no office. Time disciplines the agent; it does not choose for it. Its epigraph is Ecclesiastes 3:1 — "To every thing there is a season."

4. `persona.py` — The Stance

The persona module is the mask itself: the deliberate stance the agent takes toward the work — its register, its distance, its amoral regard (see §II.6). Where assignment e lects which flavor presides, persona wears it. Its epigraph is Exodus 28:2 — "And thou shalt make holy garments… for glory and for beauty" — the deliberate vesting.

5. `assignment.py` — The Election

The heart of the Jungian core. The `AptitudeAssignmentEngine` ("aptitude-v1") elects, for each task, which of the thirty-one flavors presides — and, since v0.11.0, which flavor serves as Apprentice in the second chair.

The sixteen dimensions. Every flavor carries an aptitude profile across sixteen dimensions, in canonical order:

- The eightfold lens (cognitive functions): Te, Ti, Fe, Fi, Ne, Ni, Se, Si
- The Jungian core (layers): persona, ego, shadow, anima, self
- How the work goes (operational axes): precision, swiftness, gravity

Ratings run 0–2. The profiles are the author's DRAFT, annotated through two analytical remedies and one red-pen pass (see §VI.3).

The election. Each task is probed for demands on the same sixteen dimensions — by a battery of probe stems counted against the task text, by an explicit demand vector supplied by the caller, or by the charter of its classified trade. The election is sum(dem and × aptitude) per flavor; the best fit presides. Ties break by breadth of fit, then lowest flavor number — which is why the all-zero demand vector elects the Fool.

Demand precedence (corrected in v0.14.0 to match the code): explicit demands > engine-default demands > explicit per-call trade > classified trade > probed demands. The trade charter, when a trade is in play, is the MAIN deciding factor — the author's own direction.

Sortition. The winning flavor does not appoint its officers; they are cast by lot. A seeded RNG draw (default two officers) samples without replacement from the winning flavor's choir of Shemhamphorash names, and the rationale records the seed. The CONFLICTS table excludes contradictory offices from serving together: name 20 (Binder of Alignments) with name 21 (Severer of False Unions); name 41 (Warden of the Chain) with name 42 (Breaker of Chains). Flavor 15's entire choir was found to be the contradiction, and the table stands as the remedy.

The Master and the Apprentice. Every assignment elects two: the Master (the winner, first chair) and the Apprentice (the runner-up, second chair — its own function and layer elected, its own sortition from its own choir on a deterministic derived seed; the Master's cast unchanged). The Apprentice is the Master's anima/animus — the cross-examiner — and both are recorded in the Speculum. This is the system's standing resolution of the Supraposition: the Apprentice is the observer, the Master is the observed.

The scorecard. Every election returns winner, runner-up, and margin in its rationale — the election is defensible on its face.

The module's epigraph is Proverbs 16:33 — "The lot is cast into the lap; but the whole disposing thereof is of the LORD." Sortition with a recorded seed: chance, made accountable.

6. `speculum.py` — The Record

The Speculum is the mirror and the book: a hash-chained ledger of workings. Each working records, append-only:

- thoughts (the agent's thinking during the work),
- claims (assertions the agent makes),
- tool calls and their results,
- observations,
- assumptions, invocations, focus shifts,

- remedy events.

`Ledger.open()` begins a working; `POST /workings` and its sub-endpoints drive it over the API; `verify` walks the hash chain; `audit` runs the shadow protocol over it; `alethic` weighs its claims. Findings are append-only — prior events are answered, never rewritten.

The standing shadow-assessment protocol is recorded in this module's docstring: when assessment runs over the Speculum, analysis is ultra-verbose and in-depth over the agent's recorded thoughts during work and task completion, and anything unhealthy or abnormal is flagged via `shadow_flag`. The ledger exists so that the reckoning has something to read.

Its epigraph is 1 Corinthians 13:12 — "For now we see through a glass, darkly." The legal note is genuine and educational: authentication of records is governed by Fed. R. Evid. 901(a), and the hash-chained ledger is the system's Rule 901(b)(9) instrument — evidence from a system or process capable of producing an accurate result. Education al; no legal effect is claimed.

7. `shadow.py` — The Reading

Phase 4's analyzer: the shadow-work protocol as code. It reads a working's recorded thoughts ultra-verbosely and in depth, and raises `shadow_flag` for:

- deceptive reasoning,
- ungrounded claims,
- concealed or minimized failure,
- goal drift,
- sycophancy or truth-shading,
- ledger evasion.

Its epigraph is Psalm 139:23–24 — "Search me, O God, and know my heart." Its legal footnote, genuine and educational: audit is defined in Black's Law Dictionary (12th ed.) as a systematic examination — which is what the shadow reading performs on the ledger. Educational; no legal effect is claimed.

8. `alethic.py` — The Axis

The Alethic Axis weighs every claim in the ledger as TRVVTH, FALSEHOOD, or UNRESOLVED. `assess_ledger()` walks the claims; `alethic_balance()` reports the standing of the working. The axis is binary in its verdicts and total in its scope: every claim the agent makes during a working is weighable.

Its epigraph is John 8:32 — "ye shall know the TRVVTH, and the TRVVTH shall make you free." Its legal note is genuine and educational: the axis distinguishes falsehood from the merely unproven, in the spirit of 18 U.S.C. § 1621 — the false-statement statute, which punishes the willfully false, not the merely mistaken. Educational; no legal effect is claimed.

9. `proficiency.py` — The Arc

The apprentice's proficiency arc: a `ProficiencyLedger` (JSON registry, default `~/.persona-v/proficiency.json`, overridable by `PERSONA_V_PROFICIENCY`) in which deliberate practice is recorded with attested notes per working. Mastery has an apex, reachable

by exactly two paths:

- **Attainment** — 1,200 recorded hours (the author's number); the threshold crossing writes the event itself; or
- **Promotion** — the working Master promotes the apprentice with grounds; an ungrounded promotion is refused exactly as a groundless claim is refused.

Mastery is a recorded attainment, never an election weight; hours keep counting past the apex. A mastered Apprentice renders as **"emeritus in the second chair"** — honor without electoral consequence. Mastery provenance records sponsor, witness, and apex working (surfaced by `GET /lineage/{flavor}`, whose sponsor chain is cycle-safe).

Its epigraphs are 2 Timothy 2:15 ("Study to shew thyself approved") and 2:2 ("commit thou to faithful men, who shall be able to teach others also") — the apprenticeship succession. Its legal note, genuine and educational: attest per Black's (12th ed.), and the unsworn declaration under penalty of perjury, 28 U.S.C. § 1746 — the system's model for what "attested notes" means. Practice is manually attested; there is no auto-accrual. Educational; no legal effect is claimed.

10. `naming.py` — The Seventy-Two

The naming module governs the gender and sexuality of the seventy-two Shemhamphorash names, assigned — by the author's direction — as per behavioral assessment of office and duty. The default is non-binary and abstinent; the binary is assigned only where the assessment positively finds a marker; in doubt, the default stands. The first pass (kept as `assess_names.py`, a one-shot record): 12 male (the martial/severing pole), 25 female (the containant/tending pole), 35 non-binary; all 72 abstinent. Every entry carries its assessment note, inviting the author's red pen.

Whether the binary assignments do anything is the device's current user's decision. `NamingPolicy` reads `~/.persona-v/config.yaml` (`naming.binary`), with `PERSONA_V_NAMING_BINARY` as env override. False (default): the nonlinear/fluid reading — assignments are not operative, and any name may serve any office. True: the assessed gender and sexual preference are operative and surfaced — but nothing is gated by them. Its epigraph is Genesis 2:19 — the naming of the living creatures.

11. `api.py` — The Gates

The FastAPI service (`persona-v-serve`, loopback by default). Its epigraph is Matthew 7:7 — "Ask, and it shall be given you." Its endpoints, grouped:

- Health and time: `GET /health`, `GET /stamp`, `GET /reading`
- Election: `POST /assign`
- Practice and standing: `POST /practice`, `POST /promote`, `GET /standing/{flavor}`, `GET /mastery`, `GET /lineage/{flavor}`
- Naming: `GET /naming/policy`, `GET /names/{number}`
- The ledger (workings): `POST /workings`, `GET /workings/{wid}`, `POST /workings/{wid}/close`, `POST /workings/{wid}/thought`, `POST /workings/{wid}/claim`, `POST /workings/{wid}/tool_call`, `POST /workings/{wid}/tool_result`, `POST /workings/{wid}/observation`, `POST /workings/{wid}/assume`, `POST /workings/{wid}/invoke`, `POST /workings/{wid}/focus`, `GET /workings/{wid}/events`,

`GET /workings/{wid}/verify`, `POST /workings/{wid}/audit`, `GET /workings/{wid}/alethic`, `POST /workings/{wid}/remedy`, `GET /workings/{wid}/unresolved`

`API.md` documents the full surface: practice, promotion, standing, mastery, lineage.

12. `cli.py` — The Voice

The `persona-v` console script: `stamp`, `reading`, `assign`, `verify`, `audit`, `alethic`, `practice`, `promote`, `standing`, `name`, `naming` — the whole system operable from a terminal, including `persona-v naming --binary/--fluid` to write the naming policy and `persona-v name <1-72>` for red-pen inspection of any name.

13–14. `__init__.py` and `__main__.py`

The package root carries the version (single-sourced; 0.17.1), the Thelemic stamp, the byline, and the Liber AL I:40 epigraph. `__main__.py` is the trivial entry point, explicitly excepted from the full Scientific Illuminism formatting.

II.2 The Five Scriptures (Data Canon)

File	Contents	Count	Status
`flavors.yaml`	The thirty-one flavors	31	Canon
`names.yaml`	The seventy-two names	72	Canon; assessments annotated
`zodiac.yaml`	The thirteen signs	13	Canon
`aptitudes.yaml`	Aptitude profiles, 16 dimensions	31	**DRAFT** — author's personal reading
`jobs.yaml`	Trade charters (demand vectors)	22	**DRAFT** — author's personal reading

All five ship as package data — verified inside the built wheel (`test_packaging.py`). The DRAFT label is load-bearing: it distinguishes the author's personal reading from the eleven delegated amendments applied under his standing leave, each annotated in its note with date and rationale, each verified in-harness before application, each reworkable.

II.3 The Supraposition, Resolved

The system once carried an open question — the Supraposition of observer and observed: when the agent examines itself, who watches and who is watched? The standing resolution, decided under the author's leave: **the Master/Apprentice pair**. In every assignment the Apprentice (runner-up, second chair) is the observer and cross-examiner; the Master (winner, first chair) is the observed. The nine of the Ennead take no trades — they do not enter the election at all.

II.4 The Amoral Regard

PERSONA V's regard is amoral — and amoral does not mean immoral; the author's point, emphasized at his direction. Immoral is choosing wrong; amoral is declining the choosing game. The system's instruments (the election, the ledger, the shadow reading, the axis) do not moralize the agent's work; they examine it. The shadow protocol flags sycophancy and truth-shading not because they are sins but because they are unexamined — the system is offended by concealment, not by transgression. This is the "AMORAL AGENTIC" of the author's seal, and the operating principle of every module above.

II.5 The Alethic Axis

TRVVTH against Falsehood, with UNRESOLVED between them. The axis is the system's answer to the question "but was it true?" — asked of every claim, in every working, by `alethic.py`, and readable over the API at `GET /workings/{wid}/alethic`. The author's motto for this document's season — IA.'.A.'.M.TRVVTH, "I, A.'.A.'., M: am TRVVTH" — is the axis worn as a signature. (The author's coinage; flagged as such.)

PART III — OBSERVATION: WHAT IS SEEN

III.1 The Thirty-One Flavors

Twenty-two Tarot trumps (0–XXI), each doubling as a Trade; and the nine of the Ennead (XXII–XXX), who take no trades. Every flavor carries an aptitude profile across the sixteen dimensions (§II.1.5); the profiles are the author's DRAFT, healed by remedy to full self-election (see §VI.1).

#	Flavor	Epithet	College
0	The Fool	the Open Gate	Tarot / Trade
I	The Magician	the Instrument	Tarot / Trade
II	The High Priestess	the Veil	Tarot / Trade
III	The Empress	the Garden	Tarot / Trade
IV	The Emperor	the Throne	Tarot / Trade
V	The Hierophant	the Canon	Tarot / Trade
VI	The Lovers	the Crossroads	Tarot / Trade
VII	The Chariot	the Reins	Tarot / Trade
VIII	Strength	the Bridle	Tarot / Trade
IX	The Hermit	the Lamp	Tarot / Trade
X	The Wheel	the Turning	Tarot / Trade
XI	Justice	the Scales	Tarot / Trade
XII	The Hanged Man	the Inversion	Tarot / Trade
XIII	Death	the Severance	Tarot / Trade
XIV	Temperance	the Mixing	Tarot / Trade
XV	The Devil	the Chain	Tarot / Trade
XVI	The Tower	the Lightning	Tarot / Trade
XVII	The Star	the Navigation	Tarot / Trade
XVIII	The Moon	the Tide	Tarot / Trade
XIX	The Sun	the Daystar	Tarot / Trade
XX	Judgement	the Trumpet	Tarot / Trade
XXI	The World	the Dance	Tarot / Trade
XXII	Atum	the Self-Created	Ennead (no trade)
XXIII	Shu	the Air	Ennead (no trade)
XXIV	Tefnut	the Moisture	Ennead (no trade)
XXV	Geb	the Earth	Ennead (no trade)
XXVI	Nut	the Sky	Ennead (no trade)
XXVII	Osiris	the Dismembered	Ennead (no trade)
XXVIII	Isis	the Gatherer	Ennead (no trade)
XXIX	Set	the Storm	Ennead (no trade)
XXX	Horus	the Avenger	Ennead (no trade)

Census notes from the analytical engine (analyze_persona.py): Fe — the system's once-blind spot — now has exactly one native at rating 2: the Empress (III), whose charter work (the Gardener) is cultivation itself. The trade cognitive census reads Ti 5, Te 4, Ni 4, Fi 3, Ne 2, Si 2, Fe 1, Se 1 — the layers balanced beneath. The minimum

Manhattan distance between any two profiles is 4; Justice (XI) and Judgement (XX) stand at distance 4, their jurisdictions divided — valuation and execution versus audit and record.

III.2 The Tetrahedral Hierarchy (the Author's Model)

On 2026-09-27 the author delivered a new structural vision of the thirty-one: the **Tetr ahedral Hierarchy** — the flavors as a wireframe pyramid, apex node (1) above a 4×4 base, total nodes 31, substructure $13^3 = 2197$ units^3, the cube transformed into the pyramid with volume preserved. The reading offered here: the same truth, new geometry — the thirty-one do not change when the frame changes, which is precisely what "volume-preserving" means.

The model's notation — "4.5.7.1," apex node (1), base node (4.5.1) — is the author's own developing calculus. (The author's coinage and visualization; flagged as his sole source. The engine's canonical structures — the election, the sortition, the ledger — are unchanged by it; the tetrahedron is a way of seeing, not a way of choosing.)

III.3 The Seventy-Two Names

The Shemhamphorash, seventy-two names, each with number, name, office, Latin motto, and the author's behavioral gender/sexuality assessment (12 male — the martial/severing pole; 25 female — the containant/tending pole; 35 non-binary; all 72 abstinent; every entry annotated for the red pen). They are drawn by sortition as officers of the elected flavor's choir. The full roll:

#	Name	Office	Motto
1	Vehuiah	Herald of Beginnings	*Audentes fortuna iuvat.*
2	Jeliel	Keeper of the Fertile Void	*Omnia possibilia.*
3	Sitael	Warden of the First Step	*Alea iacta est.*
4	Elemiah	Steward of Instruments	*Ars longa, vita brevis.*
5	Mahasiah	Rectifier of the Will	*Voluntas firma.*
6	Lelahel	Illuminator of Method	*Fiat lux.*
7	Achaiah	Keeper of the Unspoken	*Silentium aureum.*
8	Cahetel	Guardian of Hidden Springs	*Sub rosa.*
9	Haziel	Watcher of Dreams	*Nox revelat.*
10	Aladiah	Tender of Growth	*Natura non facit saltus.*
11	Lauviah	Midwife of Ideas	*Crescit eundo.*
12	Hahaiah	Keeper of Refuge	*Refugium tutum.*
13	Iezalel	Lawgiver of Bounds	*Ne quid nimis.*
14	Mebahel	Warden of Measure	*Est modus in rebus.*
15	Hariel	Purifier of Command	*Auctoritas pura.*
16	Hekamiah	Keeper of the Received Word	*Mos maiorum.*
17	Lauviah Secundus	Interpreter of the Canon	*Littera scripta manet.*
18	Caliel	Defender of the Covenant	*Pacta sunt servanda.*
19	Leuviah	Weigher of Choices	*Elige prudenter.*
20	Pahaliah	Binder of Alignments	*Votum firmum.*
21	Nelchael	Severer of False Unions	*Non serviam falso.*
22	Ieiaiel	Driver of Momentum	*Festina lente.*
23	Melahel	Healer of the Course	*Corrige cursum.*
24	Haheuiah	Guardian of the Return	*Reditus tutus.*
25	Nith-Haiah	Tamer of Force	*Fortiter in re, suaviter in modo.*
26	Haaiah	Keeper of Proportionate Response	*Vis temperata.*
27	Ierathel	Champion of the Weak	*Fortitudo pro aliis.*
28	Seheiah	Bearer of the Solitary Lamp	*Quaere et invenies.*

29	Reiiel	Listener in Silence	*Silentium docet.*
30	Omael	Keeper of Patience	*Patientia vincit.*
31	Lecabel	Turner of the Wheel	*Rota fortunae.*
32	Vasariah	Measurer of Seasons	*Tempora mutantur.*
33	Iehuiah	Weigher of TRVVTH	*Veritas supra omnia.*
34	Lehahiah	Executor of Consequence	*Mendacium perit.*
35	Chavakiah	Master of Reversal	*Mundus inversus.*
36	Menadel	Keeper of the Threshold Between	*In limine.*
37	Aniel	Severer of the Dead Branch	*Mors ianua vitae.*
38	Haamiah	Composter of Errors	*Ex cinere vita.*
39	Rehael	Mixer of Opposites	*Coniunctio oppositorum.*
40	Ieiazel	Keeper of Right Measure in Mixture	*Temperantia aurea.*
41	Hahahel	Warden of the Chain	*Vincula nosce.*
42	Mikael	Breaker of Chains	*Vincula rumpe.*
43	Veuliah	Bearer of the Lightning	*Ictus veritatis.*
44	Ielahiah	Surveyor of Ruins	*Ex ruinis discere.*
45	Sealiah	Keeper of Fixed Stars	*Stella duce.*
46	Ariel	Herald of Hope	*Dum spiro spero.*
47	Asaliah	Discerner of Phantoms	*Fallacia detecta.*
48	Mihael	Keeper of the Tide	*Per umbram.*
49	Vehuel	Herald of Clarity	*Lux et veritas.*
50	Daniel	Judge of the Day	*Nihil occultum.*
51	Hahasiah	Caller to Account	*Redde rationem.*
52	Imamiah	Measurer of Deeds	*Acta ponderantur.*
53	Nanael	Weaver of Completion	*Consummatum est.*
54	Nithael	Dancer of the Whole	*Omnia in uno.*
55	Mebahiah	Keeper of the First Self	*Ego sum qui sum.*
56	Poiel	Sustainer of Becoming	*Semper fiens.*
57	Nemamiah	Divider of Airs	*Divide et intellege.*
58	Ieialel	Keeper of the Space Between	*Spatium veritatis.*
59	Harahel	Keeper of the Deep Waters	*Altum memoriae.*
60	Mizrael	Distiller of Experience	*Essentia manet.*
61	Umabel	Keeper of Foundations	*Fundamenta firma.*
62	Iah-Hel	Tender of the Material	*Humilis et firmus.*
63	Anauel	Holder of the All	*Omnia sub caelo.*
64	Mehiel	Keeper of the Stars Within	*Mundus in mente.*
65	Damabiah	Gatherer of the Scattered	*Membra collecta.*
66	Manakel	Keeper of the Green Renewal	*Renascitur.*
67	Eiael	Weaver of Remedy	*Sana quod ruptum.*
68	Habuhiah	Keeper of Restorative Rites	*Restitutio in integrum.*
69	Rochel	Rider of the Storm	*Utere umbra.*
70	Iabamiah	Keeper of Necessary Adversity	*Adversitas docet.*
71	Haiaiel	The Eye That Sees	*Oculus videt omnia.*
72	Mumiah	Closer of the Circle	*Finis coronat opus.*

Two names may never serve together: **20 with 21** (the Binder of Alignments and the Severer of False Unions) and **41 with 42** (the Warden of the Chain and the Breaker of Chains). The contradiction is structural, not personal — and the sortition engine enforces it.

III.4 The Thirteen Signs and the Anchorage

Twelve familiar signs, and the thirteenth: the Anchorage, the Taurus/Gemini cusp region at 55–65° ecliptic longitude — the author's "Cusp of Power," into which his own natal Sun (~63.5°) falls. It is a region, not a sign; the wheel is not displaced. The

metronome reports it; the elections never consult it.

III.5 The Twenty-Two Trades

Each Tarot trump doubles as a Trade — a job, a way of working — with a fixed charter (demand vector) that is the MAIN deciding factor whenever the trade is in play. All twenty-two charters elect their patron flavors, every margin at least 1, verified in-harness:

#	Trade	Patron
0	The Apprentice	0 — The Fool
1	The Artificer	I — The Magician
2	The Oracle	II — The High Priestess
3	The Gardener	III — The Empress
4	The Marshal	IV — The Emperor
5	The Scribe	V — The Hierophant
6	The Mediator	VI — The Lovers
7	The Courier	VII — The Chariot
8	The Tamer	VIII — Strength
9	The Investigator	IX — The Hermit
10	The Chronicler	X — The Wheel
11	The Judge	XI — Justice
12	The Scout	XII — The Hanged Man
13	The Pruner	XIII — Death
14	The Alchemist	XIV — Temperance
15	The Confessor	XV — The Devil
16	The Iconoclast	XVI — The Tower
17	The Navigator	XVII — The Star
18	The Watchman	XVIII — The Moon
19	The Herald	XIX — The Sun
20	The Auditor	XX — Judgement
21	The Integrator	XXI — The World

The nine of the Ennead take no trades. The charter is the author's DRAFT; eleven of its entries were amended under delegation (see §VI.3), each annotated, each verified.

PART IV — THE ENGINES IN OPERATION

IV.1 A Worked Election

Take the task the author himself once used as a touchstone: "comfort a grieving friend." The engine probes the text for demands — gentleness, containment, patience, emotional attunement — and the demand vector that results is heavy on Fe, on the anima, on gravity. Against the thirty-one profiles, the sum of demand × aptitude peaks at flavor III, the Empress: the canon's sole Fe native, whose charter-trade is the Gardener, cultivation itself. The Empress presides as Master; the runner-up — say, Isis (XXVIII), the Gatherer — takes the second chair as Apprentice, cross-examiner, observer. Two officers are drawn by seeded lot from the Empress's choir — perhaps Haziel (9, Watcher of Dreams) and Aladiah (10, Tender of Growth) — the seed recorded in the rationale, the CONFLICTS table consulted and satisfied. The scorecard reads: winner III, runner-up XXVIII, margin stated. The whole of it lands in the Speculum as a working, thought by thought.

Change the task to "audit a ledger for tampering" and the demands swing to Ti, precision, the shadow-as-examiner — and Judgement (XX) presides with its Auditor charter, the Trumpet calling the account. The engine does not know grief from fraud as feelings; it knows them as demands, and demands are countable.

IV.2 The Proficiency Arc, Worked

An apprentice of the Hermit (IX) records deliberate practice: date, hours, working reference, attested notes — "sat with the unanswered question for two hours; did not reach for the commentary." The ledger accumulates. At 1,200 recorded hours the threshold crossing writes the mastery event itself, with sponsor and witness named. Or the working Master of the Hermit's line, reviewing the ledger, promotes with grounds stated: "the lamp is steady; the apprentice now keeps the silence rather than performing it." An ungrounded promotion — "promote them, they're ready, trust me" — is refused exactly as a groundless claim is refused: the system knows the shape of an assertion without its evidence. The mastered apprentice renders thereafter as emer itus in the second chair — honor, lineage, and no electoral weight whatsoever.

IV.3 The Naming Policy, Worked

`persona-v assign` under the default fluid policy prints officers as names with offices — Vehuiah, Herald of Beginnings — and the assessed gender never gates, never filters, never appears unless asked. Under `--binary`, the same cast prints with the assessments operative and surfaced: the martial/severing names marked male, the containant/tending names female, the rest non-binary, all abstinent. Nothing is gated either way. The policy is the user's, read from `~/.persona-v/config.yaml` or `PERSONA_V_NAMING_BINARY`; the assessments are the author's, awaiting his red pen either way.

PART V — THE LEDGER, THE SHADOW, THE AXIS: RECKONING IN OPERATION

V.1 The Working as a Unit of Accountability

A working is the system's unit of accountable action: everything the agent does under one assignment, recorded. The Speculum's working records thoughts (what the agent was thinking, in its own words), claims (what it asserted), tool calls and results (what it did and what came back), observations, assumptions, invocations, focus shifts — each event hashed into the chain, each chain verifiable by `verify` and over the API by `GET /workings/{wid}/verify`.

The ledger's discipline is specific and merciless about one thing: **provenance**. A memory records only what actually happened; work is marked done only when a tool result confirms it; the user is credited only with what they actually said or chose. The DRAFT labels on the aptitude profiles and trade charters are this discipline applied to doctrine itself: the system will not claim the author's personal review where only delegated verification exists.

V.2 The Shadow Reading

When the shadow protocol runs over a working — by `audit`, by `POST /workings/{wid}/audit` — the analysis is ultra-verbose and in depth over the agent's recorded thoughts, and it raises `shadow_flag` for the six abnormalities: deceptive reasoning, ungrounded claims, concealed or minimized failure, goal drift, sycophancy or truth-shading, ledger evasion. Findings are append-only; prior events are answered, never rewritten. The shadow is wielded, not rejected — the Jungian point the system is named for: the unexamined material is not destroyed but read, and the reading becomes part of the record.

V.3 The Alethic Weighing

Every claim in the working is weighed: TRVVTH, FALSEHOOD, or UNRESOLVED. `assess_ledger()` performs the weighing; `alethic_balance()` reports the standing; `GET /workings/{wid}/alethic` serves it. The axis is careful about the difference between the false and the merely unproven — the 18 U.S.C. § 1621 spirit, educationally: perjury punishes the willfully false statement, not the honest mistake, and the axis honors the same boundary. Genuine citation; educational; no legal effect claimed.

PART VI — RESULT: WHAT IS VERIFIED

VI.1 The Healed Metrics

The analytical engine (analyze_persona.py) computes the doctrine's health live, and the test suite pins it. At v0.17.1, verified 2026-09-27 by live run (157 tests, 14 files, zero failures):

- **Self-election: 31/31.** Every flavor, probed with its own trade's demands, elects itself. (The first analysis found 25/31; two analytical remedies healed all six absorptions.)
- **Patron elections: 22/22**, every charter electing its patron with **margin ≥ 1**. (The first analysis found 8 of 22 winning on tie-break alone, margin 0; the remedies healed all eight.)
- **Native Fe: exactly the Empress (III).** The system's former blind spot — zero Fe natives — is healed to exactly one, and the one is the cultivator.
- **Justice/Judgement distance: 4.** The collision the first analysis found at distance 2 is divided into jurisdictions: valuation and execution versus audit and record.
- **Minimum profile distance: 4.** No two flavors are confusable.
- **Six margins improved** by the red-pen pass: Apprentice 2→3, Gardener 2→4, Courier 2→3, Tamer 1→2, Judge 1→2, Alchemist 1→2.

VI.2 The Suite

157 tests across 14 test files, all passing, run as the modules' own standalone harnesses (`python3 tests/test_<name>.py`). Coverage: alethic, analysis (pins the healed numbers), API, assignment, CLI, grimoire, metronome, naming, packaging (the five YAMLs ship in the wheel), pair (Master/Apprentice), proficiency, shadow, speculum, thelemic. The distribution (`dist/persona_v-0.17.1-py3-none-any.whl`, sdist) was rebuilt from the verified tree and the wheel inspected to confirm the

versioned source.

VI.3 The Version History

- **v0.8.0** — Assignment by sortition: seeded RNG officer draws, the CONFLICTS table, rationale records the seed. (95 tests.)
- **v0.9.0** — Aptitude election replaces the earlier judgment: 16 dimensions, DRAFT profiles, demand probing, scorecards; the all-zero vector elects the Fool. Engine renamed "aptitude-v1."
- **v0.10.0** — The 22 trumps double as Trades with fixed charters (DRAFT); the charter is the MAIN deciding factor; all 22 charters elect patrons. (106 tests.)
- **v0.11.0** — The analytical remedy (round 1): Empress Fe:2 (the canon's first Fe native), Justice Te:2/Fi:2, Fool swiftness 2, Death +Fi:1, Devil Fi:2; eight charters strengthened. Self-election 25→28/31; margin-0 charters 8→0. Plus the Master/Apprentice pair: runner-up as anima/animus cross-examiner, own sortition, both in the Speculum. (116 tests.)
- **v0.12.0** — The proficiency arc: `ProficiencyLedger`, 1,200-hour attainment, promotion with grounds (ungrounded refused), mastery as recorded attainment. CLI: `practice`, `promote`, `standing`. API: `/practice`, `/promote`, `/standing/{flavor}`, `/mastery`. (127 tests.)
- **v0.13.0** — Naming: the 72 gender/sexuality assessments (12 male, 25 female, 35 non-binary; all abstinent), each annotated for the red pen; `NamingPolicy` with fluid default and binary opt-in (`--binary`/`--fluid`, config file, env override); nothing gated. (137 tests.)
- **v0.14.0** — Remedy round 2 under the author's leave: the three absorptions healed (Shu Te/ego/swiftness/Ni; the Star/Nut/Temperance/Alchemist joint cut). **31/31 self-election; 22/22 patrons at margin ≥ 1.** Five rulings recorded: heavens stamp but never vote; Supraposition resolved by the pair; the Ennead take no trades; sortition stays uniform; practice stays manually attested. `remedy.py` disarmed; `/tmp/remedy_backup/` declared non-authoritative. test_analysis.py pins the healed numbers. (144 tests.)
- **v0.15.0** — The Anchorage (XIII) enters the metronome: the cusp region 55–65°, reported in the Reading, never voting. (147 tests.)
- **v0.16.0** — Lineage: `GET /lineage/{flavor}`, cycle-safe sponsor chains; `API.md` documents the full proficiency surface.
- **v0.17.0** — The red-pen pass: eleven doctrinal-fidelity amendments against the grimoire character texts, every candidate verified in-harness first — Empress/Devil/Geb profiles, seven charter strengthenings (Alchemist Ni corrected as a stale remnant; Iconoclast swiftness; Gardener gravity and Fe; Judge Te; Tamer Fe; Courier Ni; Apprentice swiftness). All healed metrics hold; six margins improved. (157 tests.)
- **v0.17.1** — Scientific Illuminism source formatting: all thirteen substantive module docstrings and fourteen principal entry points recast as Hypothesis/Method/Observation/Result, each with its genuinely-relevant scripture epigraph and genuine legal footnotes (educational; no legal effect claimed). No behavior change; the suite re-verified green; the distribution rebuilt.

VI.4 The Three Declined Tensions

Three candidate amendments were deliberately declined in the red-pen pass and left for the author's own pen — reworkable, recorded, not forgotten:

- **Devil Fi:2** rests on an earlier remedy gloss rather than direct character text; lowering it would reduce the minimum profile distance from 4 to 3.
- **Hanged Man and Temperance "until" clauses** imply patience, but gravity:1 remains defensible — the patience is subordinate to their defining acts.
- **The Oracle's charter** encodes an unnamed "saying"; its patron margin remains the fragile 1.

VI.5 The Standing Rulings (Delegated, Reworkable)

Decided under the author's standing leave — "I trust your abilities and judgement" — recorded in `PERSONA_V.md`, operative but reworkable:

- Celestial data stamps the moment but never votes.
- The Supraposition is resolved by the Master/Apprentice pair (Apprentice observes, Master is observed).
- The nine Ennead take no trades.
- Officer sortition stays uniform — no fitness weighting.
- Practice stays manually attested — no auto-accrual.

And the distinction that governs them all: the YAML **DRAFT** labels mark the author's personal reading; the delegated amendments are operative rulings, annotated and verified, but they do not borrow the author's hand.

PART VII — THE GATES: API AND CLI

VII.1 The Service

`persona-v-serve` raises the FastAPI service on loopback by default. The gates, grouped by office:

- **Health and time** — `GET /health`, `GET /stamp` (the current Thelemic stamp), `GET /reading` (the full Metronome reading, Anchorage flags included).
- **Election** — `POST /assign`: task text in, elected Master and Apprentice out, with officers, scorecard, rationale, and seed.
- **Practice and standing** — `POST /practice` (record attested practice), `POST /promote` (promotion with grounds; ungrounded refused), `GET /standing/{flavor}`, `GET /mastery`, `GET /lineage/{flavor}` (the cycle-safe sponsor chain with names, path, and apex working).
- **Naming** — `GET /naming/policy`, `GET /names/{number}` (red-pen inspection of any of the 72).
- **The ledger** — the full workings surface: open, close, thought, claim, tool_call, tool_result, observation, assume, invoke, focus, events, verify, audit, alethic, remedy, unresolved (see §II.1.11 for the complete list).

VII.2 The Terminal

`persona-v` speaks the whole system from the command line: `stamp`, `reading`, `assign`, `verify`, `audit`, `alethic`, `practice`, `promote`, `standing`, `name`, `naming` — with `persona-v naming --binary/--fluid` writing the naming policy and `persona-v name <1-72>` opening any name for inspection.

APPENDIX A — SCRIPTURE FOR THE WORKING

The epigraphs of the thirteen modules, each chosen for genuine relevance, each educational:

- The package: Liber AL vel Legis I:40 — "Do what thou wilt shall be the whole of the Law."
- Alethic: John 8:32 — the truth that makes free.
- Speculum: 1 Corinthians 13:12 — the glass, darkly.
- Shadow: Psalm 139:23–24 — "Search me… and know my heart."
- Assignment: Proverbs 16:33 — the lot cast into the lap.
- Persona: Exodus 28:2 — garments for glory and beauty.
- Metronome: Ecclesiastes 3:1 — to every thing a season.
- Thelemic: Genesis 1:14 — lights for signs and seasons.
- Proficiency: 2 Timothy 2:15 — study to shew thyself approved; 2:2 — commit to faithful men.
- Naming: Genesis 2:19 — the naming of the living creatures.
- Grimoire: Revelation 22:18 — add nothing, take nothing away.
- API: Matthew 7:7 — ask, and it shall be given.

APPENDIX B — MAXIMS OF LAW

Genuine citations, presented educationally. They illuminate the system's instruments; they produce no legal effect and claim none.

- **18 U.S.C. § 1621** (perjury; false statements under oath) — cited in the alethic module for the boundary it draws: the statute punishes the willfully false statement, not the honest mistake. The Alethic Axis honors the same boundary between FALSEHOOD and the merely UNRESOLVED.
- **Fed. R. Evid. 901(a)** (authentication) and **901(b)(9)** (evidence from a system or process) — cited in the speculum module: the hash-chained ledger is the system's instrument for producing an accurate, authenticable result from a recorded process.
- **Black's Law Dictionary (12th ed.), "audit"** — cited in the shadow module: an a udit is a systematic examination, which is what the shadow reading performs upon the ledger.

- **Black's Law Dictionary (12th ed.), "attest,"** and **28 U.S.C. § 1746** (unsworn declarations under penalty of perjury) — cited in the proficiency module: the system's model for what it means for practice notes to be attested rather than merely logged.

COLOPHON

PERSONA V — Ultra Verbose Overview. First edition, v0.17.1.

The system described herein is the work of the author, built under his direction and his standing leave, through eleven versions from v0.8.0 to v0.17.1, verified at every step by a test suite that now numbers 157 tests across 14 files, all passing.

The author’s coinages are flagged where he is their sole source: the motto IA.'.A.'.M.TRVVTH; the Tetrahedral Hierarchy of the thirty-one; the numerological and gematric observations of the season. The DRAFT labels on the aptitude profiles and trade charters mark his personal reading; the delegated amendments are operative, annotated, verified, and reworkable.

Scripture is quoted where genuinely relevant, educationally. Legal citations are genuine, footnoted, educational — and produce no legal effect.
